CLASSIC

QUEENLINE

***Notes on correct fill level:** The correct fill level on a “Queen-line” or “Classic” style honey jar is at the top of the fill ring of each jar. The fill ring is the raised ridge or ring of glass immediately above the shoulder of the jar, and below the threads. It can be distinguished from the threads in two ways: a) the fill ring forms a complete circle, without ends; and b) the fill ring will be completely parallel with the bottom and top of the jar. There should be enough honey in the jar to reach the top of the fill ring, without going over. Liquid honey in a circular shape forms a concave surface sometimes referred to as a meniscus. **For purposes of filling honey jars for exhibition, the edge of the meniscus should meet the top of the fill ring.** A jar of honey being over-filled is preferable to one being under-filled.
